PRODUCT DECK

AniLumi

An anime discovery site: airing schedule in your time zone, seasonal charts, auto-built watch orders and a binge planner.

anilumi.in · Harsh Lariya

Fans juggle wikis, Reddit and streaming apps to answer simple questions: what airs tonight, what order to watch a franchise in, and where to watch it.

IDEAL CUSTOMER PROFILE (ICP)

Anime fans on phones in South Asia, especially viewers looking for Hindi dubs, plus newcomers asking where to start a long franchise.

JOB TO BE DONE (JTBD)

"When I want to start or keep up with a show, tell me what to watch next, when it airs for me, and where I can watch it."

Every common fan question answered on one fast page: local-time schedules, auto-built watch orders, binge times and where to watch. No sign-up.

ALTERNATIVES USERS HAVE TODAY

- MyAnimeList
- Fandom wikis
- Reddit threads
- Streaming app search

04 · HOW IT WORKS

01 Kitsu + AniList data → 02 Hourly refresh → 03 Schedules & charts →

04 Watch orders & tools

NORTH STAR METRIC

Weekly engaged visitors (2+ pages)

Discovery sites win when one answer leads to the next question, not on single bounces from search.

INPUT KPIS

- Search clicks per page type
- Pages per visit
- Watchlist adds
- Share of mobile and Hindi-page traffic

GO-TO-MARKET (GTM)

- Long-tail SEO: watch order, binge time and parents' guide pages per show
- Hindi dub pages for the audience the data revealed
- Bing and Google discovery

MONETISATION

Affiliate links (manga and merchandise) once traffic is steady; display ads later. Measured as revenue per 1,000 visits.

Two data sources with graceful failure

Trade-off: More code, but an API outage never becomes a false 404.

Follow Google's rating rules

Trade-off: Lost star snippets, kept search trust.

Paid edge hosting (~$5/mo)

Trade-off: Small cost for fast pages close to users in India.

NOW

Grow Hindi dub coverage

NEXT

Dub release alerts and a Hindi page per show

LATER
