PRODUCT DECK

HarshOnRoads

An India trip planner that builds itineraries from verified destination data first, and clearly labels anything AI-researched.

harshonroads.com · Harsh Lariya

Generic AI trip planners invent places, timings and distances. Travellers need plans they can actually drive, within their days and budget.

02 · WHO IT'S FOR

IDEAL CUSTOMER PROFILE (ICP)

Weekend travellers and road-trippers in India, especially from Delhi NCR: working professionals, students on a budget, and drivers.

JOB TO BE DONE (JTBD)

"When I have a free weekend, tell me where I can realistically go, how long it takes, and what it will cost."

03 · VALUE PROPOSITION

Itineraries built from verified destination data first, with AI-researched plans clearly labelled. English and Hindi.

ALTERNATIVES USERS HAVE TODAY

- ChatGPT trip plans
- Travel blogs and reels
- Tour operators

01 Budget, days & style → 02 Verified destination data →

03 Ranking & matching → 04 Day-by-day itinerary

NORTH STAR METRIC

Trip plans generated and saved

A saved plan means the user trusts it enough to use it.

INPUT KPIS

- Plans per visitor
- Plan-to-save rate
- Return visits before a long weekend
- Search clicks on destination pages

GO-TO-MARKET (GTM)

- My own travel content: 264+ YouTube Shorts and Instagram
- Destination and itinerary SEO
- Long-weekend finder as a recurring hook

MONETISATION

Hotel and travel affiliates once traffic reaches ~1K visits/day; own trips later.

Verified data first, labelled AI fallback

Trade-off: Slower coverage, but plans users can trust.

Content as the acquisition channel

Trade-off: My time, not ad spend, but compounding reach.

NOW

Two new destinations and two articles a week
