PRODUCT DECK

PayHours Calc

Fast, private calculators for US hourly workers and small-business payroll, built as a programmatic SEO site.

payhourscalc.com · Harsh Lariya

People searching for a time card or overtime calculator land on slow, ad-stuffed pages that get edge cases wrong, like overnight shifts and state overtime rules.

IDEAL CUSTOMER PROFILE (ICP)

US hourly workers checking a paycheck, shift managers, and small-business owners running payroll without software.

JOB TO BE DONE (JTBD)

"When I need to know what I'm owed or what to pay, give me the right number in seconds, with the rules for my state."

Fast, private calculators that get the edge cases right, with no account and pages that print clean.

ALTERNATIVES USERS HAVE TODAY

- Calculator.net-style generic sites
- Payroll software free tools
- Spreadsheets

01 Keyword research → 02 Calculator → 03 Programmatic pages →

04 Search Console

NORTH STAR METRIC

Calculations completed per week

Each completed calculation is a solved job, and it maps directly to ad and affiliate revenue.

INPUT KPIS

- Search impressions and clicks
- Calculator completion rate
- Pages per visit
- Revenue per 1,000 visits (RPM)

GO-TO-MARKET (GTM)

- Programmatic SEO: 415 pages incl. "$X an hour is how much a year" and 2026 state tax pages
- Keyword-led page selection
- Outreach to state-specific publications

MONETISATION

Display ads plus a payroll-software affiliate (Gusto) for small-business owners. Target: high-RPM US traffic.

Keyword data before code

Trade-off: Slower start, but every page targets real demand (~900K searches/month).

Fully static pages on the edge

Trade-off: No saved history, but instant loads at near-zero cost.

NOW

Index all 415 pages and track clicks

NEXT

Minimum wage by state and more tax pages

LATER

Apply for ads and the Gusto affiliate at traffic threshold
