PRODUCT DECK

Kundli Jyoti

A Vedic astrology app that computes kundli, matching and dasha from real planetary positions, then explains them in plain language.

kundlijyoti.com · Harsh Lariya

Astrology apps in India lead with fear and upsells. Users can't tell what was calculated and what was made up, and generic chatbots invent planetary placements.

02 · WHO IT'S FOR

IDEAL CUSTOMER PROFILE (ICP)

Indian adults aged 20–40 checking marriage compatibility, families keeping profiles for parents and kids, and daily rashifal readers.

JOB TO BE DONE (JTBD)

"When I'm making a big decision, help me understand what my chart actually says, without scaring me into buying something."

Readings computed from real planetary positions, explained like a friend would. Free, private, no ₹5,000 gemstone upsell.

ALTERNATIVES USERS HAVE TODAY

- AstroTalk-style paid chat apps
- Generic AI chatbots
- Family pandit

01 Birth details → 02 Planetary computation → 03 Kundli & dasha →

04 Plain-language reading

NORTH STAR METRIC

Weekly returning users

Astrology is a habit product. Coming back for the daily rashifal shows trust better than one-off kundli downloads.

INPUT KPIS

- Kundli completion rate
- Day-7 return rate
- WhatsApp shares per 100 kundlis
- Report unlocks (after pilot)

GO-TO-MARKET (GTM)

- SEO: daily rashifal, panchang and festival pages
- WhatsApp sharing of results
- Installable PWA for repeat use

MONETISATION

Free pilot first. A ₹199 detailed kundli report is built (Razorpay) and switches on only once retention is proven.

Compute first, AI only explains

Trade-off: Less "magical" chat, but no invented placements.

Birth data stays on the device

Trade-off: No cloud history, but privacy becomes the pitch.

Free pilot before payments

Trade-off: Delays revenue so pricing rests on real retention.

NOW

Measure return visits and shares

NEXT

Festival and muhurat pages ahead of each festival

LATER

Turn on the ₹199 report and test price points
